

Tau Beta Pi

The Engineering Honor Society

Funding a Fellowship or Scholarship

The Fellowship Program is one of Tau Beta Pi's key initiatives for the advancement of engineering education and the profession. The freedom afforded to TBII Fellows to do graduate study in a field of their choice enables them to contribute to the engineering profession, which makes the fellowship a unique honor. Fellows are currently awarded a \$10,000 stipend.

Annual Fellowship — for \$10,000 a donor can provide an annual Fellowship to a student during the next Fellowship cycle (gift needs to be received by January each year). The donor's name is not attached to the Fellowship, nor is the donor allowed to specify any criteria regarding the student selected.

Endowed Fellowship — for \$200,000 a donor can endow a Fellowship. The donor's name (or another name, if they prefer) is attached to the Fellowship and the donor may specify one of the following criteria: chapter/university the student attends or discipline of engineering studied.

The Scholarship Program awards scholarships of \$2,000 to members of TBII for a senior year of engineering study. Members returning for one semester are eligible for a single payment of \$1,000.

Annual Scholarship — for \$2,000 a donor can provide an annual Scholarship to a student during the next scholarship cycle (gift needs to be received before March each year). The donor's name is not attached to the scholarship, nor is the donor allowed to specify any criteria regarding the student selected.

Endowed Scholarship — for \$40,000 a donor can endow a Scholarship. The donor's name (or another name, if they prefer) is attached to the Scholarship, and the donor may specify one of the following criteria: chapter/university the student attends or discipline of engineering studied. Donors can specify both if their gift is \$80,000 or more.

Subash Bhandari, KS B '20 —
"Thanks to the TBII Fellowship, the research experiences & outreach opportunities that I received during the fellowship year helped bolster the transition I was making towards my graduate education."

Elizabeth Crist, MO Γ '17 —
"The TBII Fellowship has been paramount in my ability to pursue my academic, athletic, and extracurricular passions. I am now able to improve therapeutic options for cancer patients through research."

Elizabeth Diaz-Gunning, OR Γ '22 —
"Thank you so much for the TBII Scholarship! It truly is an honor to be selected as a scholarship recipient. I'll be watching for opportunities to give back in the future."
