

TAU BETA PI PHOTOGRAPHY GUIDE

A photograph of an individual requested for publication should be a high-quality 300 dpi JPEG of any size with minimum compression. The individual should be several feet in front of a PLAIN background. The photograph should contain only the individual; it should not be a cropped group shot. It should be of a formal or semi-formal nature, and include the upper body and face. Lighting should be even (daylight is preferred over fluorescent light) and the individual should be in focus.
